

IC San Pio X - G.Bovio

Skills for life = Successful life

Progetto eTwinning

Classi 3^E e 3^F

Ottobre 2025 – Febbraio 2026

L'Ecosistema del Progetto

COORDINAMENTO

Insegnante
Donatella Locurcio

PARTECIPANTI

Gli studenti delle
classi 3^E e 3^F

DURATA

5 Mesi (Fase attiva)

OBIETTIVO FORMATIVO

Comprendere l'importanza
delle competenze quotidiane
tramite situazioni pratiche e
concrete.

Le 5 Competenze Chiave per il Futuro

Alfabetizzazione

Sviluppata attraverso la lettura condivisa e la scrittura creativa di storie.

Matematica

Calata nella realtà tramite applicazioni pratiche per la vita quotidiana.

Scienze

Affrontata attraverso un'esplorazione attiva e il metodo dell'indagine.

Competenze Digitali

Esercitate costantemente tramite la preparazione di presentazioni e la gestione di riunioni online.

Cittadinanza

Vissuta in prima persona tramite incontri internazionali e la scoperta di paesi e bandiere.

Dall'Aula al Mondo: Il Percorso Operativo

Fase Preparatoria

Creazione del logo ufficiale del progetto e preparazione delle presentazioni iniziali degli studenti.

Collaborazione Attiva

Incontri live online (con focus specifico su Polonia, Spagna e Turchia) e stesura a più mani di un libro collaborativo.

Scoperta Culturale

Visione di video tematici sulle "life skills" e partecipazione a giochi educativi interattivi su paesi e bandiere europee.

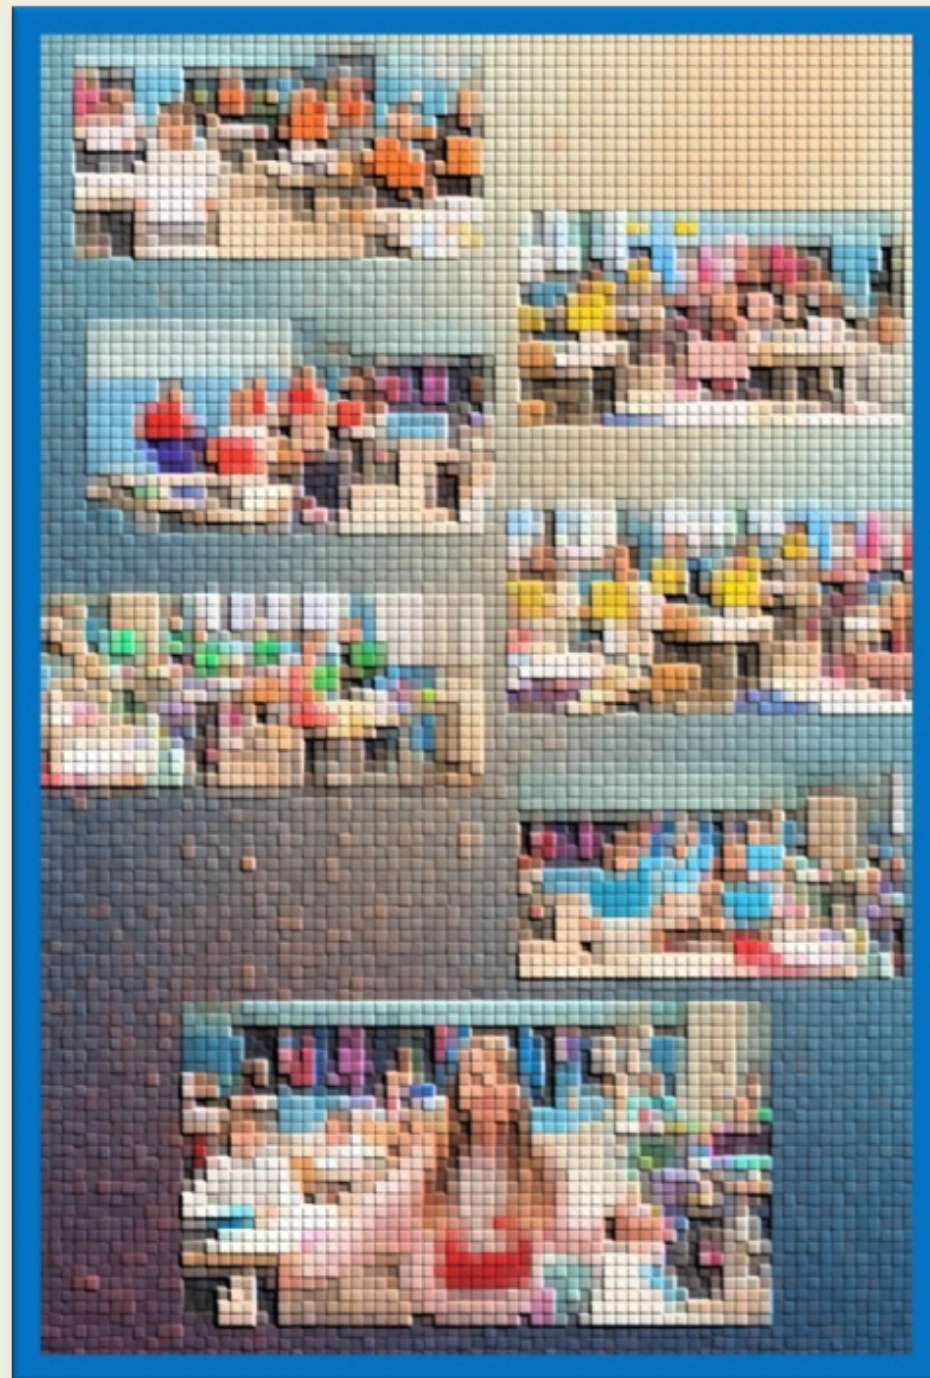

Proiezione Futura

Ricerche mirate e presentazioni sul "lavoro dei sogni", collegando le competenze apprese al futuro professionale.

Activities with my students in class

Preparing the presentations

Watching the presentation
about the skills for life

Watching Molly's cartoon

Our logo work

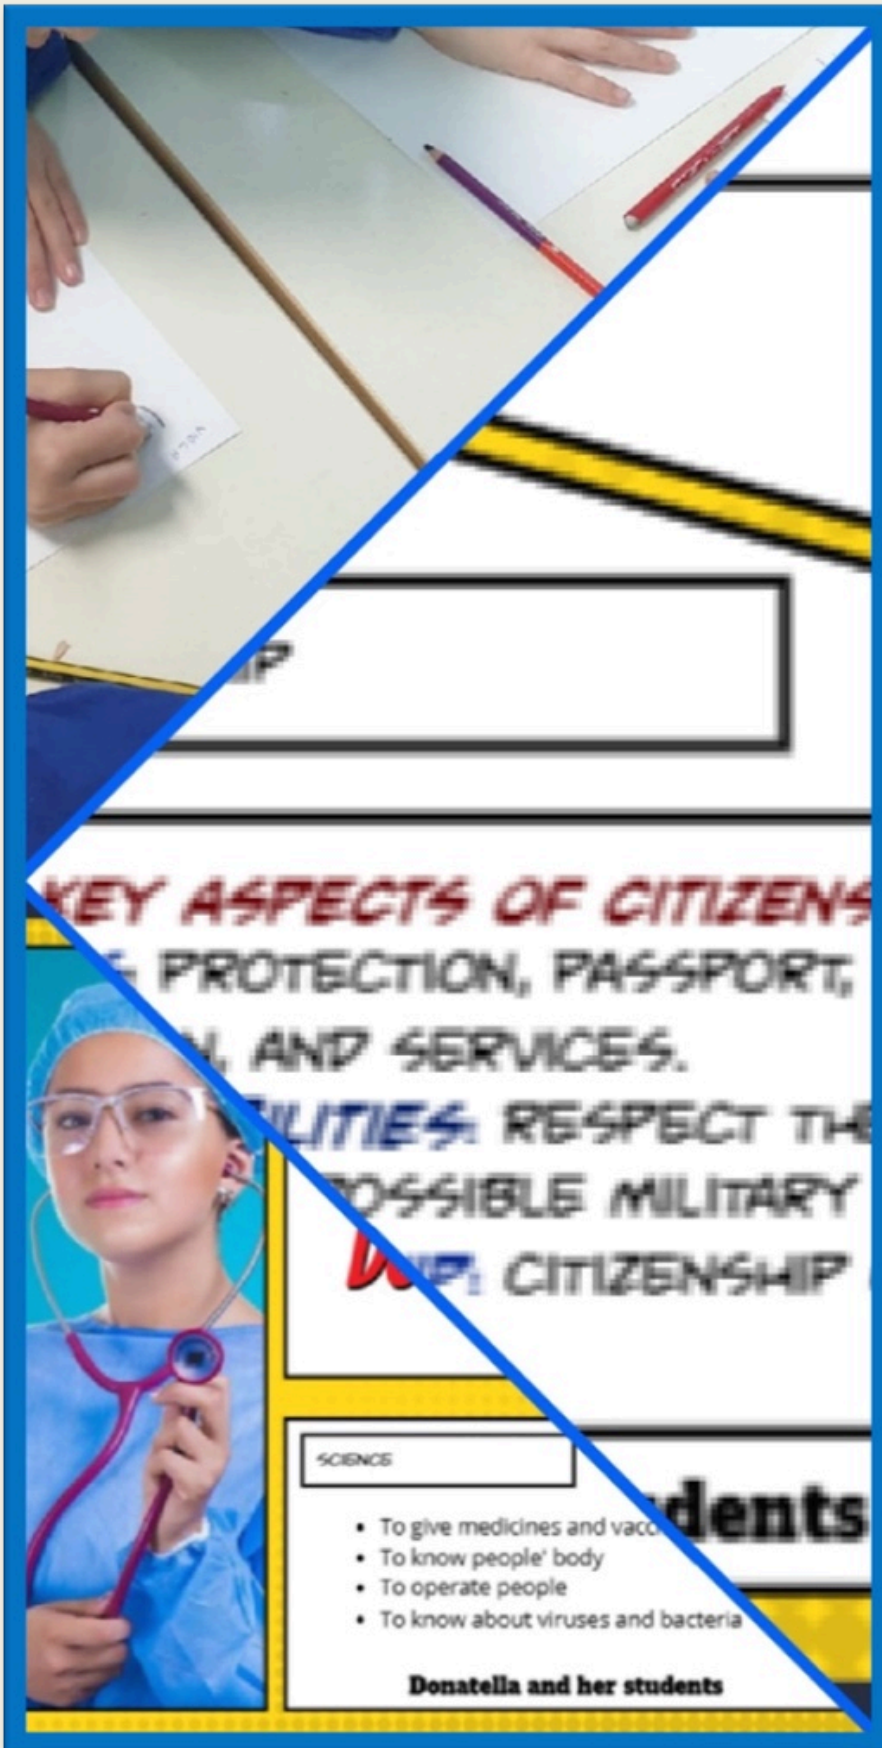

The logo chosen by

eTwinning project
Skills for life = Successful life

"Story 'Skills in my life'"

This book is a product of an eTwinning project 'Skills for life = Successful life'. Students from Serbia, Poland, Spain, Italy, Turkiye, Finland and Czech Republic wrote a collaborative story about a boy named Leo Bright and his skills for life: Literacy, Maths, Science, Digital skills and Citizenship.

Leo Bright is 10 and he lives in China. He is curious, brave and he loves asking questions. He comes from a strange monster family. His favourite food is lasagna and frogs. He doesn't like horses and wants to play the cello . Leo Bright has a big family. His grandma is a witch , his grandpa is Frankenstein. His dad was turned into a deer because he annoyed his wife. His mom is a fairy, half good, half evil. She loves to drink strawberry macha. The youngest member of the family is his sister. She looks like a minion and Leo has the power to change body parts, so he is different every day. He has a bat as a pet and its name is Mirko. They are one big happy family.

1. Start of the story drawing

2. Citizenship - Writing

Every Monday Leo transforms himself into a panda bear and goes to play with other pandas.

Some Tuesdays Leo becomes a Power Ranger and helps old people to carry their supermarket heavy bags.

On Wednesdays the family goes on a picnic. Grandma cooks frogs for Leo and bananas for his sister. When they finish they pick up all the trash.

The first Thursday every month he goes with his sister minion and his bat to see whales and they help them cleaning their skin.

2. Citizenship - drawing

3. Digital skills - writing

Leo has one more superpower. He can create the internet for his surroundings. He is like magic Wi-Fi.

On Sunday, Leo and his sister, a little minion, usually watch cartoons. But they live on a planet where the internet signal is very bad. Leo tries to make a better signal, but he is not successful.

So he calls for help from the universe. A spaceship comes and repairs the internet network. Leo makes a video of the repair and uploads it to YouTube. He wants to help others learn how to fix internet connections.

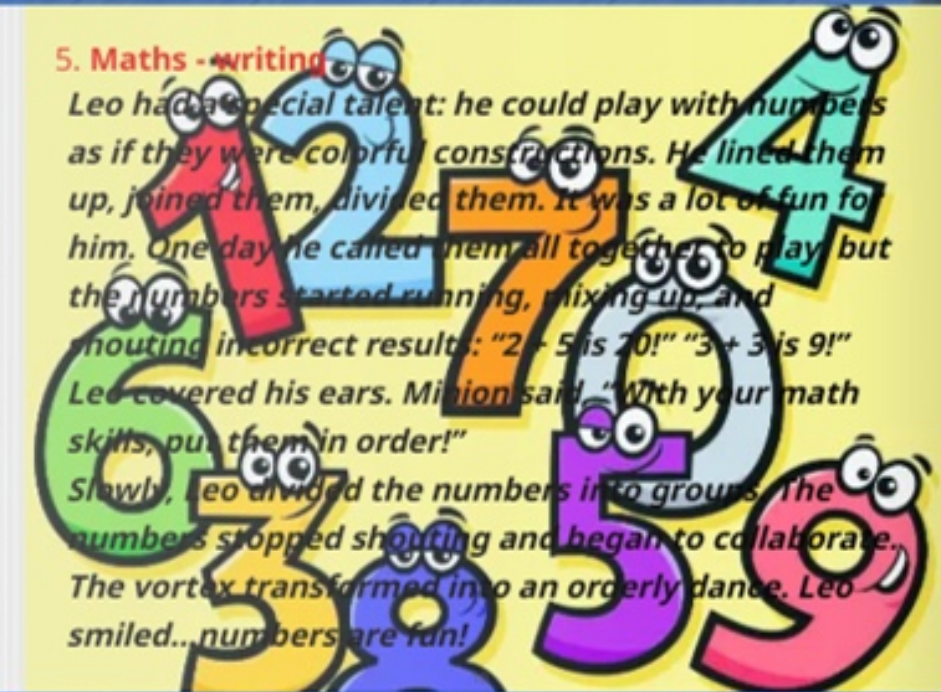

4. Science - writing

On Fridays, Leo goes to the park with his sister to play. There he uses scientific skills to find new ways to play games. He tests them with his sister.

One day, Leo spots a broken swing in the park. He decides to fix it. Leo improves the swing, making it safer and stabler. He upgrades the swing's airflow to make it go faster. He puts in a stabilizer to make the swing go more smoothly. He also puts in an engine that makes the airspeed stronger. With this technology the swing can go really fast. That makes it more fun. Finally, he puts in safety bars to keep the user safe during the ride. Everybody loves the new swing.

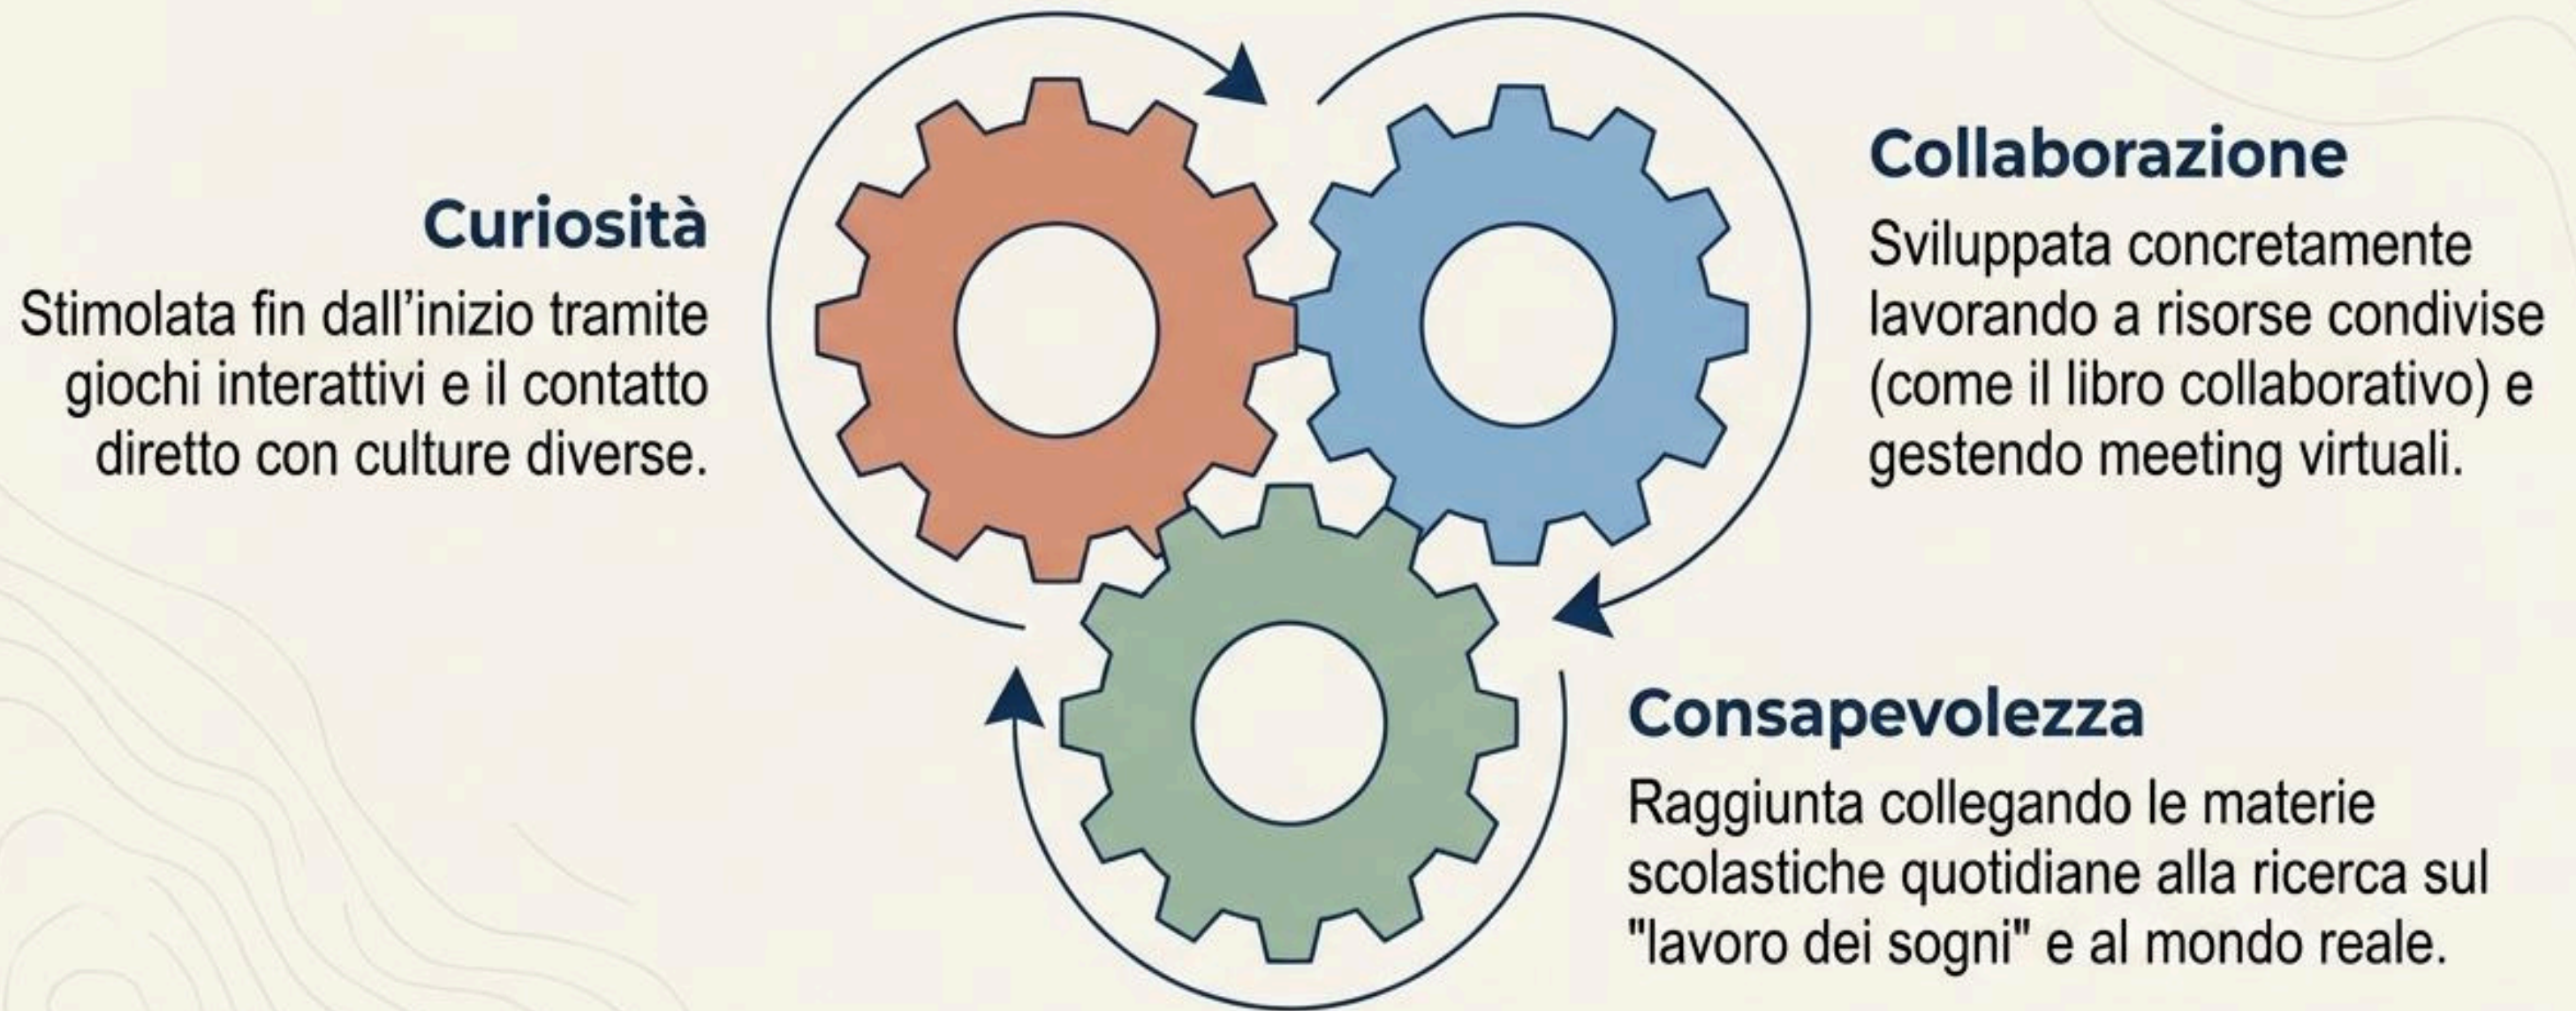

5. Maths - writing

Leo had a special talent: he could play with numbers as if they were colorful constructions. He lined them up, joined them, divided them. It was a lot of fun for him. One day he called them all together to play, but the numbers started running, mixing up, and shouting incorrect results: "2 + 5 is 20!" "3 + 3 is 9!" Leo covered his ears. Minion said, "With your math skills, put them in order!" Slowly, Leo divided the numbers into groups. The numbers stopped shouting and began to collaborate. The vortex transformed into an orderly dance. Leo smiled... numbers are fun!

Il Risultato: Un Apprendimento Significativo

L'esplorazione attiva ha trasformato concetti teorici in competenze essenziali per la vita.
Le materie scolastiche sono diventate il passaporto per il futuro degli studenti.
